-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-13, drawn to a method of identifying a compound that decreases or inhibits site-1 protease promoter activity, classified in class 435, subclass 6.
- II. Claim 14-25, drawn to a method of identifying a compound that binds to the site-1 protease promoter, classified in class 435, subclass 6.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, I a method of identifying a compound that decreases or inhibits site -1 protease promoter activity is an *in vivo* method to be performed in a host cell transformed with the promoter sequence, whereas the method of Group II is an *in vitro* method which measures a different effect than the method of Group I. The methods they have different modes of operation, different functions, and different effects and are not disclosed as capable of use together.

Inventions I-II are distinct for the reasons given above and have acquired a separate status in the art. Because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
